Installation Key Data

Parts: Agricultural machines

Parts size: H 2'000 mm  
W 1'600 mm  
L 5'500 mm

Conveyor speed: 1.5 m/min

Scope of delivery of 2 identical lines, each with:
1 x OptiFlex® AS06 / 14G  
12 x OptiGun® GA03P-1250 automatic gun  
2 x OptiSelect® Pro GM04 manual gun  
2 x Reciprocators ZA13 axis, each with 6 x U-axis UA04  
1 x ICS04 / MagicControl 4.0 (CM40) control system  
1 x OptiCenter® OC07  
1 x MagicCompact® EquiFlow® color change booth  
Dynamic Contour Detection

Pöttinger / Austria
Application Success Stories

Layout
On 14 April 2023, the second hall was officially opened at the new plant in St. Georgen near Grieskirchen (AT). After a construction period of almost 1.5 years, the agricultural machinery manufacturer Pöttinger has commissioned a modern cathodic dip priming (CDP) and powder coating line in this second expansion phase. With the new priming and coating line the parts for rakes and round balers now get their colourful coat of paint. These parts were previously delivered from the painting line at the headquarters in Grieskirchen. In addition, state-of-the-art methods are used to get orders from external companies that require high-quality coatings. Industrial customers in particular, who have the same high corrosion protection specifications as Pöttinger, are impressed. Thanks to the advanced Dynamic Contour Detection, orders can be carried out in black CDP with high wall thicknesses and heavy unit weights. The maximum suspended load is 1'200 kg.

**Top paint quality**
The automotive quality paint finish using cathodic dip priming (CDP) and powder coating is an environmentally friendly process. No solvent is used in the mixing and application of the coatings. The painting process achieves excellent hardness and therefore a longer service life. Pöttinger combines an environmentally friendly painting processes with sustainability. "The finish of the paintwork also plays a major role in ensuring the high quality expected from our machines. The impact-resistant coating lasts the entire lifetime of the product. This was one of the reasons why we also invested in a painting line at this site," emphasises Gregor Dietachmayr, Speaker of the Executive Board.
