## Company Profile

Addverb Technologies is a global robotics company based out of India. Its products incorporate the latest technologies and vastly improve the efficiency and accuracy of the intralogistics operations.

## Company Expectations

Company business has continued to grow in India & globally. They have reached a breaking point with their production process due to this growth and new business development efforts. In order to maintain production volume, color change flexibility, and achieve the required quality, they decided to invest in Gema system.

## Keys to Success

The customer has a previous plant from the competition as a comparison. The customer confirmed that the new investment in the Gema MagicCompact booth with the OptiCenter OC09 Powder Management Center meets all production requirements in terms of flexibility and efficiency.
